

CLH 60

KABELLÄGGARE

Professional cable layer for robotized installations. Suitable for any electric cable and for any robot brands. Light and compact, it can lay up to 36 meters of cable per minute. The instantaneous handle's slope allows working near bushes and hedges; moreover its adjustable and patented head bestow on the machine great agility among any obstacle.

NKO

CLH 60

Fast and easy-to-use on every ground

180° rotating head with a further blocking device for straight lines.

It is possible to spool the loop in the reel or just insert a new hank.

Prompt handlebar inclination in several position on both the sides

Wheel base may be widened in step to set the distance of the lain loop from the border (25 - 27 - 39 - 31 cm).

Technical Sheet

Engine	Honda GCV 160/B&S DOV 700
Power	5,5 HP/4,2 Kw
Laying speediness	Up to 36 mt/min
Laying deepness	From 0 to 50 mm
Loop diameter	Up to 5 mm
Minimun distance from the border	250 mm
Weight	45 kg
